DETAILED ACTION

1. According to paper filed on March 14, 2005, the applicants have amended claim 11.
2. Claims 11-14 are pending in the application.

Response to Arguments

3. Applicant's arguments filed on March 14, 2005 have been fully considered but they are not persuasive regarding obviousness rejections. The applicants have amended claims to overcome indefiniteness rejections. In regard to obviousness rejections, it was clearly stated in the last office action that the therapeutic effect of instant composition is solely due to irinotecan and the therapeutic utility of irinotecan is well known in the prior art. The applicants have not provided any unexpected results of either superior activity or reduced side effects by the instant combination over the prior art known composition comprising irinotecan.

Conclusion

4. Rejection under 35 U.S.C. 112, second paragraph is now withdrawn.
5. Rejections under 35 U.S.C. 103(a) are maintained for the reasons of record.

NEW GROUNDS OF REJECTION

Double Patenting

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 11-14 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 6 and 7 of U.S. Patent No.

6,723,729. Although the conflicting claims are not identical, they are not patentably distinct from each other because Irinotecan or a salt prepared by using 4-amino-3-propionylphenyl-1,4'-bipiperidine-1'-carboxylate or a salt is claimed in the cited patent and furthermore, the therapeutic utility of irinotecan for treating cancer is well known in the prior art.
